

Praise for 4 Generations! November 27, 2006

Whitehead Associates – Mixed Group

Very Effective. This program forces you to think about the generations in one's workplace and if their needs are being met.

Excellent. Very knowledgeable and engaging overview of the issues and characteristics of each generation.

This was so interesting. I have found ways to talk to my co-workers that enable us to get along and be productive.

I will be more thoughtful about mentoring, coaching and ways to use new talents/skills that may not be tapped.

Very knowledgeable, informative and engaging with applicable examples to utilize.

Very interesting topic. Overall, I found this class very helpful with the different generation gaps. I will now use more patience and have more understanding.

Engaging, enlightening, very informative. I now have a better understanding of each generation's differences and how they view the world.

This course helped me think about ways to do things differently...like be more assertive in asking, telling or explaining what I need or want.

Materials are excellent and the session was timely and relevant.

Excellent for increasing awareness and understanding around 4 Generations and in working through some of the "hows".... how to work with others – find solutions.
